Art Unit: 3634

Claim 8 and 9-13 dependent thereon are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 is in improper form in that it needs to end with a period.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 8-13 as best understood and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lodrick 5,072,908 in view of Haskell 411,521. Lodrick teaches the device claimed absent the plurality of rings for holding pool sticks. Haskell teaches a wall mounted rack having a plurality of rings for the purpose of holding several umbrellas. The Haskell device is capable of holding pool sticks. To therefore modify Lodrick to include a plurality of rings (instead of the single opening 58) for the purpose of holding a plurality of pool sticks would have in view of Haskell been obvious for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar holders of elongated objects are illustrated by Ulings 352,844; Paddock et al. 616,555; Holmes 634,526; Walker 28,264; Spinks 2,028,694; Alusas 2,063,289.
